Vote YES on Initiative 732 this November

• Fight Climate Change
• Promote Clean Energy
• Reduce Pollution
• Rebate taxes to families & businesses

We have a moral responsibility to protect future generations from climate change
How it works:

- Puts a price on pollution: Charges a carbon tax of $25 per ton of carbon
- Lowers the sales tax 1%: Saving the average family $200 per year
- Funds Working Families Tax Rebate: Granting 400,000 low income families up to $1500 annually
- Eliminates the B&O tax on manufacturing: Keeping good jobs in Washington

Who we are:

I-732 was created by grassroots citizens, not politicians or special interest groups. We raise our funds locally through small donations and rely heavily on volunteers. With your YES vote, we can fight Climate Change and expand clean energy.
